- GitHub: satyamsharma990
- LinkedIn: satyam—sharma

Technical Skills

- Languages:** Java, JavaScript, SQL, C/C++
- Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- Backend:** Node.js, Express.js, REST APIs
- Databases:** MySQL, MongoDB
- Tools:** Git, GitHub, Docker, Postman
- Core Subjects:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Achievements

- Finalist in Hack Energy 2.0 (National-Level Hackathon)
- Solved 300+ DSA problems across LeetCode and Codeforces

Summary

Computer Science undergraduate with strong problem-solving skills and hands-on experience building backend applications using Java, Node.js, Express.js, SQL, and MongoDB. Proficient in developing REST APIs, debugging applications, and designing scalable backend systems. Experienced in collaborating on team projects and solving 300+ data structure and algorithm problems. Seeking an Application Support Engineer role to apply technical troubleshooting, database, and software support skills.

Education

- Bachelor of Engineering in Computer Science & Engineering** Aug 2023 – May 2027
Chandigarh University, Mohali, India CGPA: 7.62
- Class XII** 2022 – 2023
K.P.S Memorial High School, Patna, India 79.2%
- Class X** 2020 – 2021
Holy Faith International Public School, Patna, India 90.4%

Projects

- FlowBit — MongoDB, Express.js, React.js, Node.js, Tailwind CSS**
 - Built a full-stack workflow automation platform supporting 20+ custom trigger-action workflows using a dynamic node-based interface.
 - Developed scalable REST APIs and backend execution logic for multi-step automation pipelines and conditional branching.
 - Integrated Socket.io-based real-time execution logs to improve system observability and debugging.
- FinGuardian — MongoDB, Express.js, React.js, Node.js, Tailwind CSS**
 - Developed an AI-powered financial contract analysis system to identify hidden risk clauses and generate structured insights.
 - Implemented secure REST APIs, document upload workflows, and role-based access control for managing user data.
 - Selected as a finalist in a national-level hackathon for solving real-world financial risk analysis problems.
- EventFlow — Node.js, Express.js, MongoDB**
 - Built a real-time event processing backend system to manage user activities with high performance.
 - Integrated Socket.io for live updates and Redis caching to improve response time and system efficiency.
 - Designed APIs and activity tracking mechanisms to support scalable real-time data flow.

Courses & Certifications

- AWS Certified Solutions Architect – Associate (Infosys Springboard) Oct 2025
- Data Structures and Algorithms using Java (Infosys Springboard) Sep 2025
- Database and SQL (Infosys Springboard) Sep 2025
- NPTEL Certification in Cloud Computing

Extra Activities

- Hack Energy 2.0 — HackGyanVerse Community (Finalist)** Mar 2026
 - Reached the final round in a national-level hybrid hackathon focused on innovation and real-world problem solving.
 - Developed and presented **FinGuardian**, an AI-powered financial risk analysis system for detecting hidden risk clauses in contracts.
 - Collaborated in a team environment to design scalable solutions under strict time constraints.
- Escape Da Vinci — CGC University Mohali (Finalist)** Feb 2026
 - Qualified for the final round in a competitive problem-solving and coding event.
 - Demonstrated strong analytical thinking, debugging skills, and teamwork in time-bound challenges.
